

Symposium on the

ARCHAEOLOGY of NEW YORK CITY

*The History and Archaeology
of the Commons:
New York's City's City Hall Park*

**Thirty-first Annual
PANYC Public Program
Museum of the City of NY
Sunday, May 1st 2011**

open to the general public

Professional Archaeologists of New York City, Inc. (PANYC) is a non-profit organization of local professional archaeologists concerned with conserving and protecting the archaeological and historical resources of New York City and educating the community about our cultural heritage. We would like to thank all those who made this year's PANYC Public Program possible. This includes staff members of the Museum of the City of New York, especially Paula Zadigian, Public Program Manager, and this year's PANYC Public Program Committee: Joan Geismar, Linda Stone, Arnold Pickman, Patience Freeman, Shelly Spritzer and Meredith Linn. We especially thank all who participated in the program and all who attended.

**31st ANNUAL PANYC Public Program:
The History and Archaeology of the
Commons: New York's City's City Hall Park**

Presented by the Professional Archaeologists of NYC (PANYC) and the Museum of the City of New York.

1:00 Welcome

Lynn Rakos, Program Chair

1:10 What Lies Beneath: Archaeological Sensitivity Mapping of City Hall Park

Ian Burrow, RPA, Vice President, Hunter Research, Inc.

In 1990 and 1994 the New York Department of General Services commissioned archaeological sensitivity studies in the City Hall Park/Commons area. The 1990 project was specifically focused on the immediate surroundings of the Tweed (New York County) Courthouse, while the 1994 study was for the whole of the African Burial Ground and the Commons Historic District, a New York City Landmark designated in February 1993. These documents were intended primarily as planning tools for the Landmarks Preservation Commission, but contain a wealth of information useful for historical and archaeological research in this part of Manhattan. This presentation will provide an overview of these documents and some of the insights they have generated on the development of this historic triangle.

1:30 City Hall: "The Vile Invention of a New York Bricklayer & a Santo Domingo Frenchman" Gerard Koepfel, Associate Editor, *The Encyclopedia of New York City*

In 1802, Aaron Burr promised Philadelphia's Benjamin Latrobe that he would win the design competition for New York's new City Hall. When he lost, Latrobe bitterly denounced the winners, "bricklayer" John McComb, Jr. and French exile Joseph Francois Mangin, and their "vile invention." In fact, McComb and Mangin were each accomplished architects and their design, largely by Mangin, was superior to Latrobe's. But City Hall was their

only collaboration and it was brief. McComb alone was chosen to oversee construction and Mangin's career never recovered. Decades later, a McComb descendant erased Mangin's name from the original drawings, a conspiracy that fooled the *New York Times* and others. Not until 2003 was Mangin officially recognized as the principal designer of New York's iconic City Hall.

PANYC Awards

Anne-Marie Cantwell, Awards Chair

Special PANYC Award for Outstanding Contributions Made by a Non-Archaeologist to New York City Archaeology

Rockmore Contracting Corporation

2:10 The Archaeology of City Hall Park

Alyssa Loorya, Chrysalis Archaeology

City Hall Park has been the subject of numerous archaeological investigations since the 1980s. However, it has been during the two most recent undertakings, in 1998 to 1999 and 2010 to present, that have provided a wealth of information regarding several aspects of history of the area including: Institutional life, manufacturing, military history, civic history and landscape transformations. This lecture will present information from these two excavation projects.

2:30 Celebrations and Feasts, Parades and Demonstrations: Artifacts of Public Ceremonies

Meta F. Janowitz, Senior Material Specialist, URS Corporation

The late-18th and early 19th centuries were a time of frequent public feasts and ceremonies, often involving the Commons in one way or another. The recent excavations at City Hall, as well as older excavations, have uncovered artifacts associated with such activities, which created or reinforced social identities and community cohesion.

2:50 Wrap-up
